SFTP in ABAP!

Lars Hvam Petersen ✓
Senior SAP/ABAP Consultant at Heliconia Labs

July 15, 2026

Its 2026, one of the longest standing problems in ABAP now seems to be solved? SAP introduced TCP support in 750, however with a fixed frame size, and SSH(protocol used for SFTP) renegotiates framing during initialization making it difficult.

Since 2022, I've had the idea to solve it by compromising performance via one byte TCP packages, which is a bit stupid, so the project has not been on the top of my list.

But with the GPT 5.6 release, I've had extra tokens to spend(also thanks to Marian Zeis for spending tokens), and trying out some looping.

So, now we have <https://github.com/open-abap/open-abap-ssh> it still needs a few adjustments and testing, but looks promising, and will also unlock connecting via SSH/deploy keys in [abapGit](#).

Its been developed(generated) using a [off stack approach](#) with [open-abap](#) allowing the agent to easily test against fresh docker-containers running [openssh-server](#) and running real [continuous integration](#) on [GitHub actions](#).

Take it for a spin, its MIT licensed, use at your own risk, pull requests welcome.
